## What's new?

**Billing and Payments**

| Summary | Description | Help Center Article |
|---|---|---|
| HCPCS Codes added | Four (4) HCPCS codes have been added to the DrChrono system and can be added to your fee schedule and included on patient claims. | |
| Updates to the Remittance Report screen | We have made a few updates to the Remittance Report screen. Going forward, the system will load information specified via filters. The default date range has been changed to 30 days, however, there is no limitation when Trace #, Verification Status, or Insurance/Patient filters are used. | |

**Clinical**

| Summary | Description | Help Center Article |
|---|---|---|
| "Inactive" provider accounts for Vaccine Records | Users can choose inactive providers from the Administered By drop-down list in the Immunizations Step 3 tab when creating a vaccination record. Please contact DrChrono Support to enable this permission. | Iron Bridge Integratio |
| Supervising Provider to reflect in the clinical note | In addition to the supervising provider's signature being visible at the bottom of the clinical note, their name will also appear in the "Provider section" of the header of each clinical note. | Creating a Supervising |
| CoverMyMeds - Manual Prior Authorization Entries | A prescriber account will not required to enter prior authorization records in DrChrono manually. | |

**API**

| Summary | Description | Help Center Article |
|---|---|---|
| API - Appointment webhooks were inconsistently triggering | Fixed an issue where the appointment_create webhooks are not sending any events even though an appointment was created. With this fix, appointment creations should trigger a webhook event each time. | |

## Resolutions

| Product Area | Summary | Description |
|---|---|---|
| Practice Management | Corrected an incorrect `something went wrong` error page while clicking the "Show Archived" under the message center. | Fixed an issue where a `something we error page appeared while clicking the Archived" under the message center. should be able to view the archived m under the message center without ge error page. |

## NOW AVAILABLE

| Summary | Description | Help Center Article |
|---|---|---|

| Two-Factor Authentication (2FA) with Authy | To further protect your account, we encourage all users to enable two-factor authentication (2FA). When you log into your account, you may see a prompt encouraging you to enable 2FA. Remember, setting up 2FA is entirely your choice, but we highly recommend it for its added security. If you would like to enable 2FA to prevent getting an alert, you can follow the steps outlined in this article: How do I set up Two-Factor Authentication (2FA) in my account? | Two-Factor Authentic |
