Billing and Payments

Summary	Description	Help Center Article
Additional HCPCS code	New HCPCS codes have been added to the DrChrono system and are able to be added to your fee schedule and included on patient claims.	
Misspelling corrected	A misspelling under the balance write-off option in account settings has been corrected.	

Clinical

Summary	Description	Help Center Article
"Date VIS Presented" for combination vaccines	*Users will be able to view current/up-to-date VIS for any vaccine. *For combination vaccines, users will see a separate VIS for each shot. The Step 2: Review & Sign screen will show a hyperlink that when clicked will redirect the user to the correlating VIS PDF from the CDC on a different tab.	Immunizations Registry - Vaccination Information Statement

Resolutions

Summary	Description	Help Center Article
Unable to Save Changes to Appointments in the Billing Details Screen	We have resolved an issue that was impacting some users' ability to make and save changes to appointments in the Billing Details screen.	
ERA order in the remittance report section	ERAs will default from newest to oldest by posted date. There are multiple filters on the screen that will allow you to organize the information in whatever order you need.	Sorting of ERA/Remittance Report Files
Archived Appointment Profiles Appearing after Archival	Resolved an issue in which archived appointment profiles were showing in the appointment profile dropdown.	

API Update Appointment_delete webhooks	We have added values patient_id, office_id, and doctor_id while pushing a GET request for appointment_delete webhooks.	
Unable to change office provider	Resolved an issue that was preventing users from changing the primary provider for an office.	
OnPatient Access Enabled indicator	Users will now be able to see the green "OnPatient access enabled" indicator within the patient's chart with our new chart header layout.	
API - Custom Appointment Status	We have resolved an API issue that was impacting the ability to add an appointment custom status when using the API.
