

# INTERNAL: Printing Supervising Provider on Patient SuperBill

07/24/2024 6:00 pm EDT

To print the supervising provider on the patient's superbill, the provider first needs to be set up to have a supervising provider.

After that is verified/complete, there is a Practice Group (PG) setting that will enable both the rendering provider and supervising provider to print on the patient's superbill.

Supervising Provider in  Enabling this checkbox will display the supervising provider information on the patient's Superbill SuperBill
