

# DrChrono Payments: Stripe - how to update existing bank information

07/24/2024 2:05 pm EDT

Updating your bank information with Stripe is easy! You can enter the new details right from your Stripe Dashboard.

Here's how:

1. From the Stripe dashboard menu, click on the [Settings](#) icon and go to 'Business Settings'. Depending on the country your Stripe account is based in you will need to click on [External Payout Accounts and Scheduling](#) or [Bank accounts and currencies](#).
2. Click on the **three dots** next to the bank account you would like to update.
3. Click '**Edit Bank Account**'.
4. Provide the new bank account information.
5. Click '**Edit Account**' to update.
