# Connecting Square to your DrChrono Account

07/24/2024 1:20 pm EDT

DrChrono's integration with Square makes it easy to take credit card payments in one place without having to log in to a different site. You can easily connect Square to your DrChrono account.

1. Hover your cursor over the **Account** tab and click on **Provider Settings**. Go to the **Patient Payments** tab.

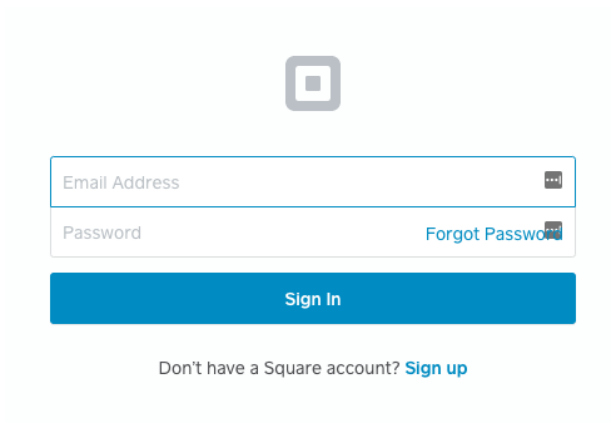

2. Click **Connect** under the Square heading.

3. To complete the process, a popup window from Square will populate and prompt you to create an account or sign in to Square. Please click **Sign Up** if you do not already have a Square account and follow the steps.

4. Once you have signed in, there will be a list of permissions in the popup window. Click **Allow**.

drchrono is requesting permission to do the following:

Read my merchant profile information
Includes name, profile image, and email address.

Read my payment history
Includes all incoming payments and refunds.

Create payments and refunds
Allows application to take payments and refund payments on my behalf.

Read my customer contact information
Includes customer name, email and phone number.

Modify my customer contact information
Allows adding, changing or deleting customer contact information including
customer name, email, phone number and stored credit cards on file.

Manage my device credentials
Includes name, device code, and location ID

Process in-person payments
Allows mobile applications to connect with Square readers and handle
payments directly, without transferring control to the Square Point of Sale
application.

Privacy Policy   Allow

If you wish to enable Square access across the practice group, simply select the checkbox and click **Update**. This will allow all providers in the group to process payments with the same Square account.

◼ Square

Connect to Square   ✔ Connected | **Disconnect**

Default Location   Brendan's DrChrono ▾

☑ Enable Square access for the entire practice group
