How do I automatically copy ICD-10 diagnosis codes to my patient's chart?

07/24/2024 3:45 pm EDT

With the *Auto Set Problems* feature in the DrChrono EHR, you have the option to type in ICD-10 codes into your appointment and have them automatically added to your patient's problem list. When paired with the Auto Set Diagnosis feature, those codes will be also automatically added to future appointments with the patient, saving you time while scheduling appointments.

To automatically copy your ICD-10 codes to your patient problem list, you will first need to enable the Auto Set Problem setting within your account settings.

To access this setting, first, go to Account and select Provider Settings.

Account	Marketplace
ACCOUNT S	ETTINGS
User Settir	ngs
Provider S	ettings
onpatient §	Settings
Account S	etup
Custom Fie	elds

• Within account settings, select the Medical Billing tab.

In your billing settings, scroll down to the **Miscellaneous** section and check the **Auto Set Problems** setting. Click **Update Entire Profile** to continue.

Miscellaneous

Default ICD Code Version	Auto									
Copying billing respects provider	Copy Last Billing* in billing profiles dropdown and "Auto Copy Procedures" copy billing data from the last appointment scheduled by you.
