

Diagnosis Codes in Rx (ONC Changes)

07/24/2024 1:45 pm EDT

DrChrono will support Dx codes specifically in reference to the Dx codes that are active for a patient.

This update will also remove inactive Dx codes from RxRequests that we receive back from the pharmacy such as, Renewals and Changes. However, we will keep Dx codes for past medications and active medications that are resolved. Only Dx codes that are deleted will be removed from the active and past medications but will remain within the prescription log.

Dx codes will be supported in a number of areas related to prescriptions including:

1. Prescription Log
2. Active Medication
3. NewRx
4. RxRenewal
5. RxChange
6. CancelRx

The screenshot displays the DrChrono patient profile interface. The top navigation bar includes 'Schedule', 'Clinical', 'Patients', 'Reports', 'Billing', 'Account', 'Marketplace', and 'Help'. A search bar and notification icons are on the right. The left sidebar contains a menu with items like '+ Add new patient', 'Demographics', 'Appointments', 'Clinical Dashboard', 'Documents', 'Eligibility', 'Tasks', 'Problem List', 'Medication List', 'Send eRx', 'Allergy List', 'Drug Interactions', 'CGMs', 'Intake Data', 'Lab Orders', 'Immunizations', and 'Growth Charts'. The main content area shows a patient profile for 'Dr. Mark Williams, DrChrono'. It includes a 'CDS' section with 'Patient age 20-40 (May 23)', 'Patient must have documented allergies', and 'Adult Immunization Schedule Age: 27-49'. Below this is a 'Demographics' section with fields for Patient SSN, Patient Date of birth (06/08/1988), Approx Age, Sex (Male), Race (Asian), Race - Subcategories (Northern Arapaho), and Ethnicity (Declined to specify). A green checkmark indicates 'Sufficient patient demographics to bill insurance.' Buttons for 'New Referral', 'Fax Demographics', 'Print Demographics', 'Apple Health App Data', 'Vitals', and 'Schedule New Appointment' are also visible.
