

How to prescribe a compound medication for a non-controlled substance

07/24/2024 5:15 pm EDT

You can use the compound medications feature to send electronically or print compound prescriptions.

From the patient chart, select **Send eRx** from the menu on the left and click on **Compound** in the new prescription screen.

The screenshot shows the 'New Prescription' interface. At the top, there is a 'Patient's Prescriptions' button with a plus sign. Below it, the 'Compound' tab is selected in the 'Type*' field, with an arrow pointing to it. The 'Medication*' field is empty. The 'SIG*' field has a gear icon and is empty. The 'Effective Date' field is empty. The 'Dispense*' field has a calendar icon and is empty. The 'Dispense Unit*' field is a dropdown menu. The 'DAW' field has 'Yes' and 'No' buttons, with 'No' selected. The 'Refills' field is empty and contains the number '0'. There are checkboxes for 'Add to Favorites' and 'Add to Medication List'. A 'Notes to Pharmacist' section is present with a warning: '* Please do not enter SIG, Effective Date, Drug Name, Strength, Quantity or Dispense Unit in this field.' and an empty text box. At the bottom, there is a checkbox labeled 'There is no controlled substance within the compound prescription*'. The 'Favorite medications' dropdown is visible at the top right of the form area.

You can then enter the prescription information in the Medication field. Ensure you check the box next to **There is no controlled substance within the compound prescription**.

Re-sending Compound Prescriptions

- Like non controlled and controlled medications, users can resend compound orders via
- Medication List
- Active Medication Orders
- Select Order
- Click Re-send Medication Selected Medication

The newly generated medication order will appear in the Active Medication Orders list. The original compound medication order will then show in the Past Medication Orders list with a status of "inactive" and an "end date" of when it was resent.
