

Batch Ordering Schedule II Controlled Substances

07/24/2024 12:34 pm EDT

If you need to order a schedule II controlled substance medication for a 90-day supply, for example for patients who maintain the same prescription, you can do so using the **Batch** button when sending a prescription from a patient's chart. This will create 2 additional medication orders with effective dates 30 days apart.

1. Go to a patient's chart and select **Send eRx**.

The screenshot displays a patient's chart interface. On the left is a sidebar menu with the following items: Demographics, Appointments, Clinical Dashboard, Documents, Tasks (2), Problem List (13), Medication List (7), **Send eRx** (highlighted in green with a black arrow pointing to it), Allergy List (4), Drug Interactions (1), CQMs, Intake Data, Lab Orders, and Immunizations. The main content area is titled 'New Prescription' and includes a 'Patient's Prescriptions' button with a plus sign. Below this is a 'Medication' form with a 'Favorite medications' dropdown. The form fields include: 'Type*' with buttons for 'Medication' (selected), 'Compound', and 'Supply'; 'Medication*' with a search dropdown; 'SIG*' with a gear icon and an information icon; 'Effective Date' with a date input field; 'Dispense*' with a calculator icon and an input field; 'Dispense Unit*' with a dropdown menu; 'DAW' with 'Yes' and 'No' (selected) buttons; and 'Refills' with an input field containing '0'. There are checkboxes for 'Add to Favorites' and 'Add to Medication List' (checked). A 'Notes to Pharmacist' section contains a text area and a disclaimer: '* Please do not enter SIG, Effective Date, Drug Name, Strength, Quantity or Dispense Unit in this field.'

When you enter and select a Schedule II controlled substance in the medication field a **Batch** button will appear. Enter a **Days Supply** and click **Batch**. The total days supply for the batch cannot exceed 90 days and cannot have Refills > 0.

If your Days Supply total exceeds 90 days, you will receive an error message.

drchrono.com says

The DEA limits the total prescription of a schedule II drug to a 90 day supply. Please reduce the total to 90 days or less to continue.
