

Electronically Prescribing Controlled Substances with ID.me in DrChrono

07/24/2024 2:20 pm EDT

Once you have had your identity verified through [ID.me](#) and been approved in DrChrono, you can send electronic prescriptions for controlled substances (EPCS). With ID.me there are two ways you can perform multi-factor authentication (MFA) to send prescriptions: a [push notification](#) or a [code generator](#).

Under **Account > Provider Settings > eRx Info** you can see which option of 2-factor authentication (2FA/MFA) is set up for your account. You can set up both types, but only one can be used as the primary device. For further information on adding or changing devices, please see our [resources](#) and ID.me's [support information](#).

Account Settings

3. Review the prescription and click **Ready to Sign** the, **Send Prescription**.

The screenshot shows a 'Prescription Summary' page. At the top right, there is a 'Send Prescription' button highlighted with a green callout box. Below the summary, there is a 'Medication List' section for 'Cotempla XR-ODT 17.3 mg oral tablet, disintegrating, extended release (CS Level 2)'. In this section, a 'Ready to sign' button is highlighted with a red callout box. The page also includes pharmacy information for 'Shollenberger Pharmacy' and a 'Drug-Drug & Drug-Allergy Interactions' section showing 'No drug interactions found'.

Note: A patient's address must be recorded in the chart to send a prescription.

4. Enter your **DrChrono Password** and click **Sign & Send Prescription**.

The screenshot shows an 'Authentication is Required' dialog box. It contains a text area with the following text: 'By completing the two-factor authentication protocol at this time, you are legally signing the prescription(s) and authorizing the transmission of the information in the previous screen to the pharmacy for dispensing. The two-factor authentication protocol may only be completed by the practitioner whose name and DEA registration number appear in the previous screen.' Below the text is a 'DrChrono Password' input field. At the bottom right, there is a 'Sign & Send Prescription' button highlighted with a blue callout box.

5. On your ID.me application, a request will be sent. Tap **Yes** to approve. In DrChrono, the prescription will load and send.
