

Sending a Prescription with a Supervising Provider

07/24/2024 9:10 pm EDT

If you need to have a supervising provider included on a prescription, you can do so by contacting your account manager, implementation specialist or our support team.

You will need to specify:

- Who can supervise
- Who needs supervision

Once this feature is enabled you can add the supervising provider's information to prescriptions. For information on sending prescriptions, see our article [here](#).

1. To begin, navigate to the **Send eRx** page of the patient's chart. There will be a dropdown menu to select the supervising provider.

The screenshot shows the 'New Prescription' form. At the top right, there is a dropdown menu for 'Supervising Provider' with 'Dianrang' selected. A black arrow points to this dropdown. To the right of the dropdown is a 'Patient's Prescriptions' button with a plus sign. Below the dropdown is a 'Medication' section with a 'Favorite medications' dropdown. The 'Type*' section has three tabs: 'Medication' (selected), 'Compound', and 'Supply'. Below this is a 'Medication*' dropdown. The 'SIG*' field has a gear icon and a dropdown. The 'Effective Date' field is empty. The 'Dispense*' field has a calendar icon and a dropdown. The 'Dispense Unit*' field has a dropdown. The 'DAW' field has 'Yes' and 'No' buttons, with 'No' selected. The 'Refills' field has a value of '0'. There are checkboxes for 'Add to Favorites' and 'Add to Medication List'. Below these is a 'Notes to Pharmacist' section with a text area and a note: '* Please do not enter SIG, Effective Date, Drug Name, Strength, Quantity or Dispense Unit in this field.'

2. Select the supervising provider from the menu and complete the prescription as you normally would.
