

Searching for Your Patient's Pharmacy

07/24/2024 8:25 pm EDT

The pharmacy search within DrChrono is powered by [Surescripts](#), a service that connects U.S. pharmacies and provides electronic prescription transmission capabilities. In order to search for a pharmacy within the DrChrono platform, the pharmacy must be connected via Surescripts.

Occasionally, a patient will use a pharmacy that is either not connected via Surescripts or does not support electronic prescriptions. If you have followed the steps within this guide and cannot find your patient's preferred pharmacy, please reach out to the support team and provide us with the name of the pharmacy, and the full street address (street number, street name, city, state, and postal code).

Searching for a Pharmacy

To begin searching for pharmacies, navigate to the new prescription page in **Patient Chart**. Go to the left-hand navigation bar and select **Send eRx**. At the new prescription page, navigate to the bottom of the page to the select pharmacy section.

1. Select **Mail Order** or **Retail**. **Retail** will be selected by default. If the patient has a default pharmacy in their chart, it will appear below the pharmacy search area.

Select Pharmacy

The screenshot shows the 'Select Pharmacy' interface. At the top, there is a search bar with the placeholder text 'Name / Location / Phone / NCPDP ID' and a magnifying glass icon. To the right of the search bar are two buttons: 'Show Favorites' and 'Patient's Default'. Further right are four tabs: 'Mail Order', 'Retail' (which is highlighted with a blue background and a black border), 'Other', and 'Proximity' with a dropdown arrow. Below the search area, a pharmacy result is displayed for 'Walgreens #00689'. The result includes a location pin icon, the address '121 E EL CAMINO REAL, MOUNTAIN VIEW, CA 940402701', a phone number '+1.650.961.7555', a fax number '+1.650.961.9945', and a 'Retail' icon. To the right of the pharmacy details are two checkboxes: 'Add to Favorites' and 'Set as Patient Default'. At the bottom right of the result card is a blue button labeled 'Preview Prescription'.

2. There are multiple ways to search for a pharmacy.

Note: Searches are limited to 20 results.

- You can search by **proximity** to the patient based on the patient's address in their chart.

Select Pharmacy

This screenshot is similar to the previous one, but the 'Proximity' dropdown menu is open. An arrow points to the 'Proximity' tab. The dropdown menu lists the following options: 'None', '< 5 miles of patient', '< 10 miles of patient', '< 25 miles of patient', '< 50 miles of patient', and '< 100 miles of patient'. The 'Preview Prescription' button is still visible at the bottom right.

You can search by City
