

Healthmonix MIPSpro Procodes

07/24/2024 3:15 pm EDT

Healthmonix MIPSpro created PROcodes to document quality actions or eligibility criteria that do have codes assigned by CMS. PROcodes give you the ability to indicate if a certain eligibility criterion was met or if certain actions were met or not met for measures criteria where CMS has not designated a code like a CPT, ICD-10, or a numerator code. Some measures require one or more PROcodes to determine eligibility or performance.

Attached to this article you can find a spreadsheet of the PROcodes and their associated

1. You can find PROcodes in your Healthmonix MIPSpro account by going to the **Visits** section in the **Quality** section.

Dashboard

Total MIPS Score 4 / 100

Category	Description	Progress
 Quality	Measure clinical data for health care processes, outcomes, and patient care experiences.	Continue 4 / 40
 Promoting Interoperability	PI is the new name for "Advancing Care Information." Enter measure data, review performance, and finalize data for submission.	Continue 0 / 25
 Improvement Activities	IA is a new reporting concept introduced by MIPS regarding activities related to patient population.	Begin 0 / 15

 Measures

 Data Entry

 Requirements

 Ready To Submit

Nice Work! With the measure selection requirements met, you can now enter patient and visit data.

 **Visits (6,954)**
Enter, review, & edit patient visits

2. Select the patient.

Visits

Add, edit, and review visits.

About this page

The Visits page lists all the Quality visits associated with this group. Use the filters on the left to find specific visits and measure instances. The first few column headers on the table are also clickable to allow for sorting. At the bottom of the page, use the "Export" feature to view the visit and measure information on this page in Excel.

The measure status for each instance appears as an icon in the visits table. See the legend below the filters for more info about the icons. Note: Due to rules associated with numerous measures, it is likely that not all of the instances on this page will be included when calculating performance. To see performance, view the [Quality Performance report](#). To see Top 6 measures, view the [Quality Points report](#).

Filters Showing 6,954 of 6,954 Visits Per Page 25 Add Visit

3. Scroll down, and select **Read More** to view the entire entry, and find the appropriate PROcode for the measure.

#126 "Provisional" Diabetes Mellitus, Diabetic Foot and Ankle Care, Peripheral Neuropathy --Neurological Evaluation

1. Did the patient have one of the noted diagnoses of diabetes mellitus? (Denominator Criteria)

Yes
 No

TIP: ICD-10-CM: E10.10, E10.11, E10.21, E10.22, E10.29, E10.311, E10.319, E10.3211, E10.3212, E10.3213, E10.3219, E10.3291, E10.3292, E10.3293, E10.3299, E10.3311, E10.3312, E10.3313, E10.3319, E10.3391, E10.3392, E10.3393, E10.3399, E10.3411, E10.3412, E10.3413, E10.3419, E10.3491, E10.3492, E10.3493, E10.3499, E10.3511, E10.3512, E10.3513. Read more...

2. Did the patient have one of the noted encounter codes WITHOUT telehealth modifiers of GQ, GT, 95, or POS 02? (Denominator Criteria)

Yes
 No

TIP: 11042, 11043, 11044, 11055, 11056, 11057, 11719, 11720, 11721, 11730, 11740, 97161, 97162, 97163, 97164, 97597, 97802, 97803, 99201, 99202, 99203, 99204, 99205, 99212, 99213, 99214, 99215, 99304, 99305, 99396, 99397, 99398, 99399, 99310, 99324, 99325, 99329, 99327, 99328, 99334, 99335, 99336, 99337, 99341, 99342, 99343, 99344, 99345, 99347. Read more...

3. Was the patient an eligible candidate for a lower extremity neurological exam? (Denominator Criteria)

Yes
 No

TIP: Risk categorization and follow up treatment plan should be done according to the following table:

Category	Risk Profile	Evaluation Frequency
0	Normal	Annual
1	Peripheral Neuropathy (LOPS)	Semi-annual
2	Neuropathy, deformity, and/or PAD	Quarterly
3	Previous ulcer or amputation	Monthly to quarterly

Documented reasons for the patient not being an eligible candidate include: the patient is a bilateral amputee, the patient has a condition that would not allow them to accurately respond to a neurological exam (dementia, Alzheimer's, etc.), the patient has a previously documented diabetic peripheral neuropathy with loss of protective sensation.

SYSTEMS FUNCTIONALITY NOTE: If you are using data integration services or are utilizing the codes submission box at the top of this visit, this question is answered by using code PRO126.3Y for "Yes".

An active diagnosis of bilateral amputation of leg below or above knee starting before the end of the measurement period

SYSTEMS FUNCTIONALITY NOTE: If you are using data integration services or are utilizing the codes submission box at the top of this visit, this question is answered by using code PRO126.3Y for "Yes".

PROcodes can be added to DrChrono through **Custom Procedures**. See our article on creating custom procedures [here](#).

Once the codes are in your account you can add them to encounters in the **Billing** section for the appointment.
