

Initiation and Engagement of Substance Use Disorder Treatment eCQM CMS137v11

07/24/2024 6:15 pm EDT

Description

Percentage of patients 13 years of age and older with a new substance use disorder(SUD) who received the following:

Two rates are reported

- Percentage of patients who initiated treatment, including either an intervention or medication for the treatment of SUD within 14 days of the diagnosis
- Percentage of patients who engaged in ongoing treatment, including two additional interventions or short-term medications, or one long-term medication for the treatment of SUD within 34 days of the initiation.

Guidance

This eCQM is a patient-based measure.

This version of the eCQM uses QDM version 5.6. Please refer to the eCQI resource center (<https://ecqi.healthit.gov/qdm>) for more information on the QDM

Initial Population

Patients aged 13 years of age and older as of the start of the measurement period who were diagnosed with a new SUD episode during a visit between January 1 and November 14 of the measurement period.

Date of birth information can be entered in DrChrono in the patient chart under the **Demographics** tab with the **Patient's Date of Birth**.
