Time Zone Support

07/24/2024 9:41 pm EDT

For practices that have offices, patients, and/or providers across different time zones, it can be a challenge to schedule patients and providers when factoring in the time zone variable. DrChrono has introduced a feature to better support this process.

If you are interested in having this feature enabled for your account please contact your account manager. If you do not remember your account manager's contact information you can email accountmanager@drchrono.com.

• Once the feature is enabled, there will be a dropdown menu at the top of the calendar. It will default to the time zone from your browser.

When you select a different time zone from the menu, the appointments will shift and display in the new time zone, making it easier to visualize your schedule across time zones.
