

Creating and Using Reminder Profiles

07/24/2024 1:35 pm EDT

A reminder profile is a preset list of reminders you can choose from to alert your patients of their upcoming appointments. Reminder profiles are easy to set up and provide an efficient way to remind your patients via email, text, and phone calls.

Creating patient reminders is easy but it requires two separate steps. Creating the reminder profile and then applying the reminder profile to the appointment.

Creating Reminder Profiles

1. Hover over the **Schedule** tab and click **Reminder Profiles**.

2. To create a new profile from scratch, click the grey **+New Profile** button.

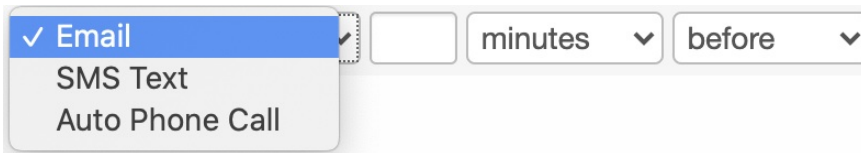

3. Enter a name in the **New Profile Name** box.

4. To add new reminders click the green **+New Reminder** button.

5. Select the type of reminder from the dropdown. DrChrono offers one-way email, text, and phone calls.

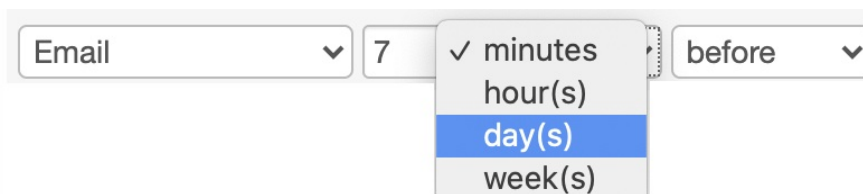

A dropdown menu is open, showing three options: "Email" (selected with a checkmark), "SMS Text", and "Auto Phone Call". To the right of the menu, there is a text input field containing the number "7", followed by a unit dropdown menu set to "minutes" and a timing dropdown menu set to "before".

6. Enter a number in the field between the reminder type and unit of time drop-down menus. This number will determine when the reminder goes out in relation to the rest of the settings.

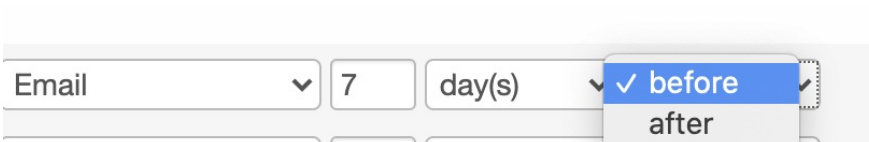

The form shows the "Email" dropdown selected. The text input field now contains the number "7", which is highlighted with a black border. The unit dropdown is set to "day(s)" and the timing dropdown is set to "before".

7. Select a unit of time from the dropdown. This will determine when the reminder goes out in relation to the reminder selected.

The form shows the "Email" dropdown selected, the number "7" in the input field, and the unit dropdown menu open. The menu options are "minutes", "hour(s)", "day(s)" (selected with a blue highlight), and "week(s)". The timing dropdown is set to "before".

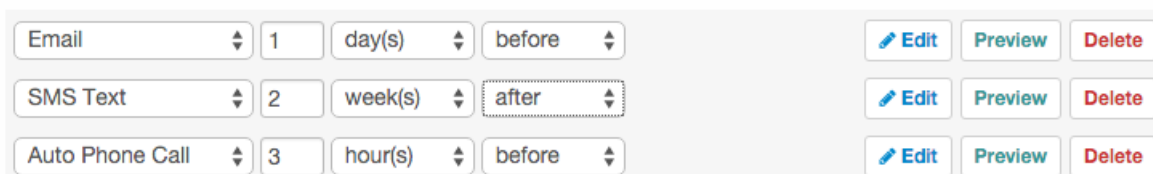

8. Select when you would like the reminder to go out in relation to the date selected, either before or after.

The form shows the "Email" dropdown selected, the number "7" in the input field, the unit dropdown set to "day(s)", and the timing dropdown menu open. The menu options are "before" (selected with a blue highlight) and "after".

In the example above, an email will go out 7 days before the scheduled appointment.

9. You can add multiple reminders by clicking the green **+New Reminder** button until you have all the reminders you want for one profile.

A list of three reminders is shown. Each row contains a dropdown for the reminder type, a text input for the number, a dropdown for the unit, and a dropdown for the timing. To the right of each row are three buttons: "Edit" (with a pencil icon), "Preview", and "Delete".

Email	1	day(s)	before	Edit	Preview	Delete
SMS Text	2	week(s)	after	Edit	Preview	Delete
Auto Phone Call	3	hour(s)	before	Edit	Preview	Delete

10. Once you're done, click the blue **Save Reminder Profile** button.

A blue button with the text "Save Reminder Profile" in white.

Below are examples of standard text, email, and voice reminders.

Note: DrChrono only supports SMS text reminders to US-based numbers and US territories.

Phone Reminders: You can't change or edit the phone reminder that is sent out. If you send out a phone reminder,

here is the message that will be played for the customer:

This is an automated appointment reminder from "Provider's Name". You have an appointment with "Provider's Name" on "Day, Month, Date, Time". If you need to reschedule your appointment please call "Office Number". Please press 1 to confirm this appointment. Please press 2 if you are not a patient of "Provider's Name". Please press 3 if you would like to be directly connected to the office of "Provider's Name".

Applying Reminder Profiles

There are two ways to apply reminder profiles: by default and at the appointment level.

Applying Reminder Profiles by Default

You also have the option to set a reminder profile as **Default**. If this option is applied, reminders associated with that profile will be sent out to all patients without any other action needed.

Check the **Default?** box and click **Save Reminder Profile**.

Standard Reminder Default?

Auto Phone Call 3 day(s) before

SMS Text 2 day(s) before

Email 1 day(s) before

Don't forget your insurance card.

Reminder Profiles on the iPad

When creating appointments from the EHR app and the Check-In app it will automatically apply the last used reminder profile to the appointment. If you don't want any reminders associated with the appointment, please log into the website and remove the reminders from the appointment.

Notes on Adding Text to Reminder Emails and Text Messages

Standard text reminders are limited to 140 characters. Customizing your text reminders may cause this limit to be exceeded, resulting in multiple text messages toward your monthly limit.

There is no text limit when adding additional text to email reminders. However, the editor for email reminders uses HTML. This means that if you would like to have your custom message rendered on different lines or in multiple paragraphs, you need to use a little bit of code with `
`. Otherwise, the message will be delivered in one paragraph.

Example 1: No use of `<be>`.

Email [v] 3 day(s) [v] before [v]

Looking forward to seeing you. Please remember to bring your ID and insurance card. Call the office with any questions.
