

# How do I add a patient's picture to their chart on the iPad?

07/24/2024 3:35 pm EDT

When using the [EHR app](#), you can very easily attach your patient's picture to their chart using your device's camera.

1. To begin, select the appointment or use the search tool to find a patient with a chart picture you would like to add or change. Tap on the camera icon or the patient's picture to take a photo.

The screenshot shows the EHR app interface on an iPad. At the top, the status bar displays the time (9:51 AM), date (Wed Jul 28), and battery level (99%). The app header includes a search bar, a refresh icon, and a plus icon. The main content area is divided into two columns. The left column shows a list of appointments for the date 07/28/2021 Wed (2). The right column shows the patient profile for Dana Harris (Female | 31 | 07/28/1990) with a camera icon and a black arrow pointing to it. Below the patient profile are sections for Appointment Details, Billing Details, Patient Flags, CDS Matches, and Vitals. The bottom navigation bar includes icons for Dashboard, EHR, Messages (6), Tasks (36), and Account.

Using the camera, take a picture of your patient. You'll have the option to use or retake the picture.

After you have taken a picture that you are satisfied with, you'll see your patient's chart with your updated picture.
