Electronically Prescribing Controlled Substances with ID.me on the iPad EHR

07/24/2024 2:20 pm EDT

You can easily send controlled substance prescriptions on DrChrono's EHR app for the iPad Similar to sending a prescription through the web, there are two ways ID.me performs multi-factor authentication (MFA) to send prescriptions: a push notification or code generator.

There are a few ways to get to the Send Prescription page on the EHR app.

1. Tap on the **patient's name** and next tap on **Send eRx**.
