

Scheduling an Appointment from the iPhone EHR app

07/24/2024 8:25 pm EDT

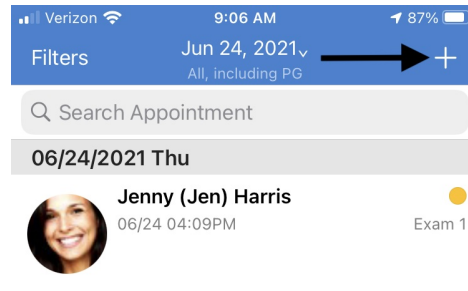

The DrChrono EHR app makes it easy to create appointments through your iPhone for existing patients and new patients.

Create an appointment for an existing patient:

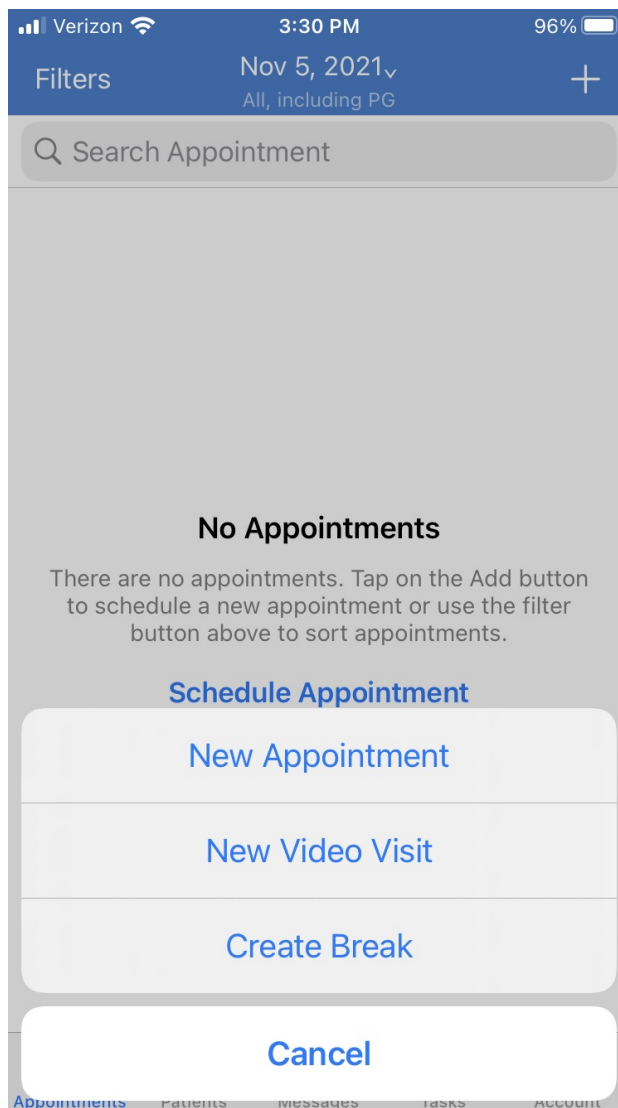

1. After logging in to the app, tap the (

) icon.

2. Select **New Appointment** or **New Video Visit**.

3. Search for the patient you need for the appointment.

Select a Patient

Find any patient by his/her name.

[Start](#)

4. Once you have selected the patient, tap **Date & Time** to scroll through and find the desired appointment slot. You can also select a provider, and appointment profile, and add other appointment information. Select **Save** when finished. The appointment will be added to your schedule.

Create an appointment for a new patient:

If you need to add an appointment for a new patient, you will first need to add the patient to your EHR account.

1. After logging in, select **Patients** from the bottom menu.

Tap the plus (

) icon to add a new patient.

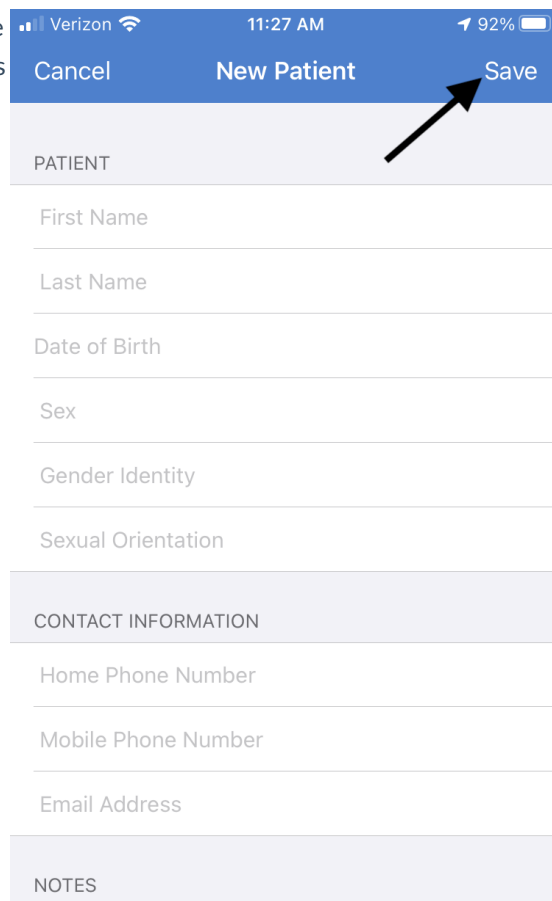

Select a Patient

Find any patient by his/her name.

[Start](#)

2. Fill out the patient's information and select **Save**. Once saved, you can search for the patient and follow the steps in the [existing patient](#) section above to schedule an appointment.

The screenshot shows a mobile application interface for adding a new patient. At the top, there is a blue header bar with three options: 'Cancel', 'New Patient', and 'Save'. A black arrow points to the 'Save' button. Below the header, the form is organized into sections: 'PATIENT', 'CONTACT INFORMATION', and 'NOTES'. The 'PATIENT' section includes input fields for 'First Name', 'Last Name', 'Date of Birth', 'Sex', 'Gender Identity', and 'Sexual Orientation'. The 'CONTACT INFORMATION' section includes input fields for 'Home Phone Number', 'Mobile Phone Number', and 'Email Address'. The 'NOTES' section is currently empty.
