

# Appointments List Capabilities through the iPhone EHR app

07/24/2024 12:29 pm EDT

This tutorial will show you the different functionalities in the appointment list through the DrChrono EHR app on the iPhone.

## Initial Screen View:

When you log in to the EHR app the initial screen will be your appointment list. Any scheduled appointments for the current day will appear in list format. To view appointments on different dates, tap the date on the top of the screen and select the date you want to see.

## Selecting a patient:

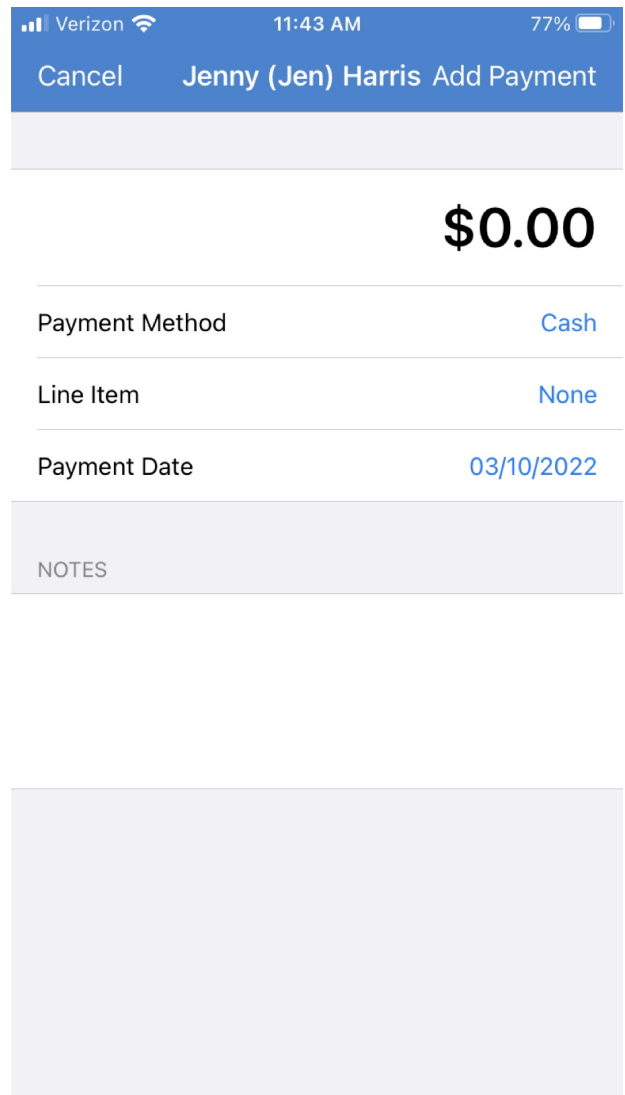

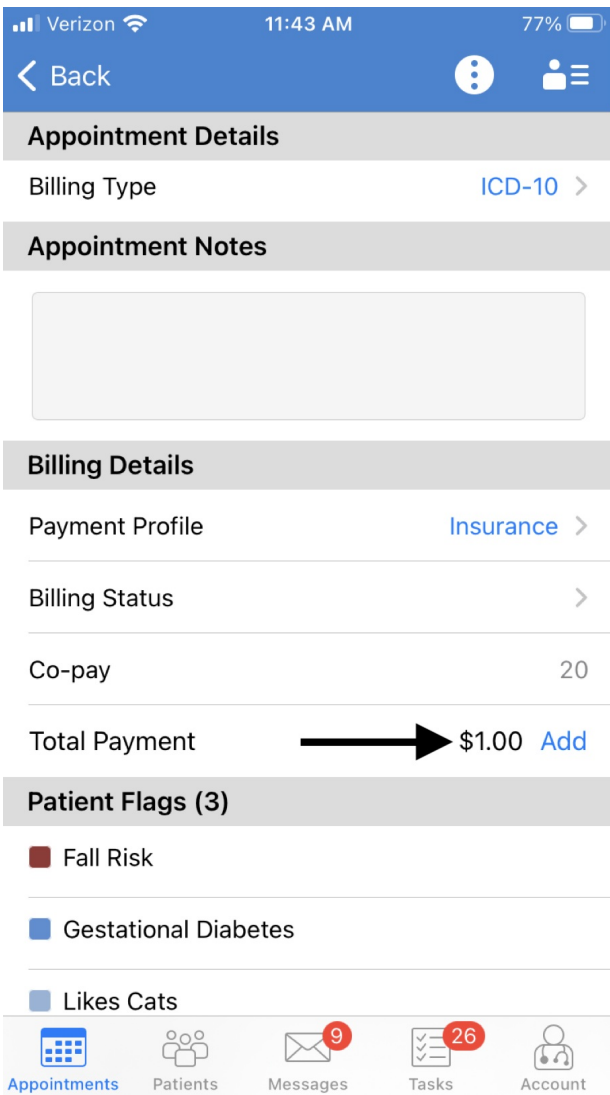

Select an appointment from the list to view more information. From this screen you will be able to see:

- The scheduled appointment time
- The reason for visit
- The exam room
- Patient information

- The **Start Visit** to begin the appointment

The screenshot shows a mobile application interface for a patient's appointment. At the top, the status bar displays 'Verizon', signal strength, Wi-Fi, the time '11:43 AM', and battery level '78%'. Below the status bar is a blue header with a 'Back' button, a settings icon, and a profile icon. The main content area features a patient profile for 'Jenny (Jen) Harris', a female aged 42, born on 02/11/1980. There are links for 'Super Bill' and 'Vitals', and an information icon. A prominent 'Start Visit' button is displayed. Below this is a section titled 'Appointment Details' with a grey background, containing the text '03/10 11:20AM, 30 minutes' and 'Physical Exam'. A list of appointment details follows, including 'Appointment Profile' (Physical Exam), 'Appointment Status', 'Appointment Status History', 'Office' (Office 1), 'Exam Room' (Exam 1), and 'Provider'. At the bottom is a navigation bar with five icons: 'Appointments' (selected), 'Patients', 'Messages' (9 notifications), 'Tasks' (26 notifications), and 'Account'.

Scroll down to add payment information. Tap **Add** next to **Total Payment** to open the payment window.

### Making Appointment Notes:

Appointment notes can be added by scrolling down to the **Notes** field. You can add notes manually, [macros](#) you have created, or [speech-to-text](#). These notes will not appear on the patient's clinical notes and are for internal use only.

**Take a patient photo to add to the patient's chart:**

You can take a picture of the patient to add to their chart or to change their current picture. To do this select the (

)icon next to the patient's name to access the camera.

**Laurie Sample**

Female 31

12/08/1990

[Super Bill](#) [Vitals](#)

[Start Visit](#)

### Appointment Details

03/10 03:14PM, 30 minutes

[Appointment Profile](#) >

[Appointment Status](#) >

[Appointment Status History](#) >

[Office](#) [Office 1](#) >

[Exam Room](#) [Exam 1](#) >

[Provider](#) >

Use the iPhone's camera to take the profile picture. Tap **Use Photo** to save the picture to the patient's profile.
