How do I change my appointment status on the iPhone?

07/24/2024 3:45 pm EDT

With the DrChrono EHR app, your appointment status can be changed and will reflect in your DrChrono web version calendar.

To change your appointment's status on the EHR page, select the appointment. Within your appointment, tap on the **Appointment Status** option to reveal a menu that allows you to select your appointment status. The status will be updated. Repeat for any other appointment status changes.
