

How do I add or change a patient's picture to their chart on the iPhone?

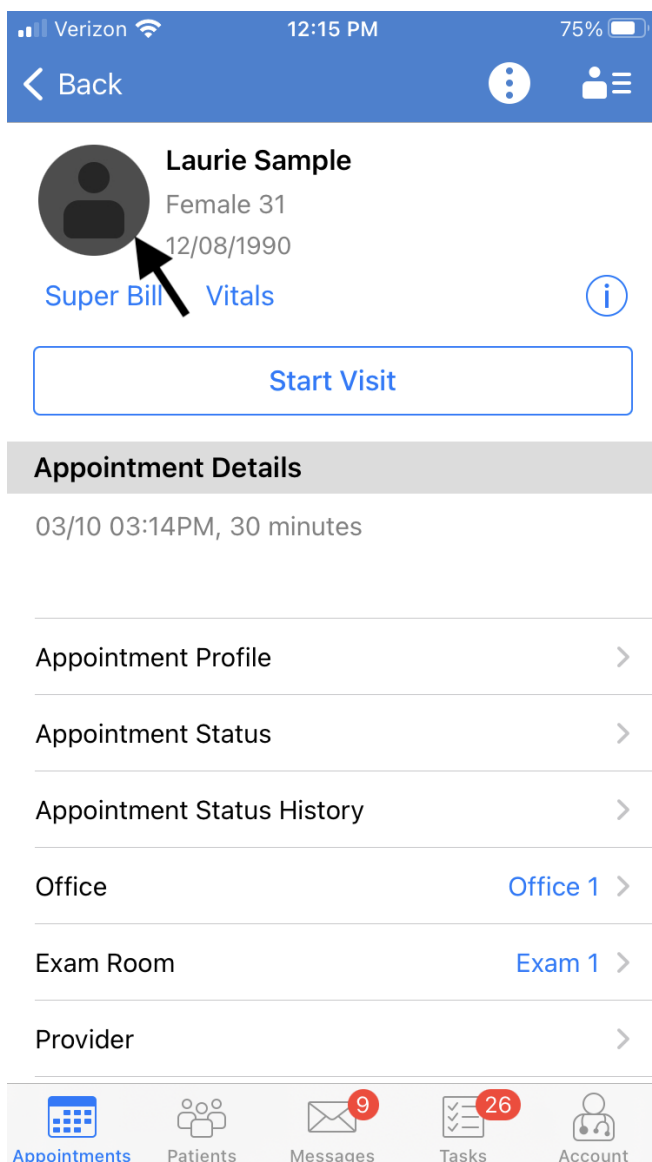

07/24/2024 3:35 pm EDT

When using the [EHR app](#), you can very easily attach your patient's picture to their chart using your iPhone's camera.

You can take a picture of the patient to add to their chart or to change their current picture. To do this select the (

)icon next to the patient's name to access the camera.

Use the iPhone's camera to take the profile picture. Tap **Use Photo** to save the picture to the patient's profile.
