How do I order a lab on my iPhone?

07/24/2024 4:10 pm EDT

In the EHR app on your iPhone, you can order lab tests just as you would with the browser EHR or iPad.

Labs can be accessed through the patient menu (

≞≡

) in the appointment window or by searching for the patient. Select **Labs** to start the order.

A list of your previously ordered labs will appear. To send a new lab test, tap on the (

)button in the upper right-hand corner of the page.
