

Upload a Saved Image, Document or Past Clinical Note to a Clinical Note on the iPhone

07/24/2024 10:01 pm EDT

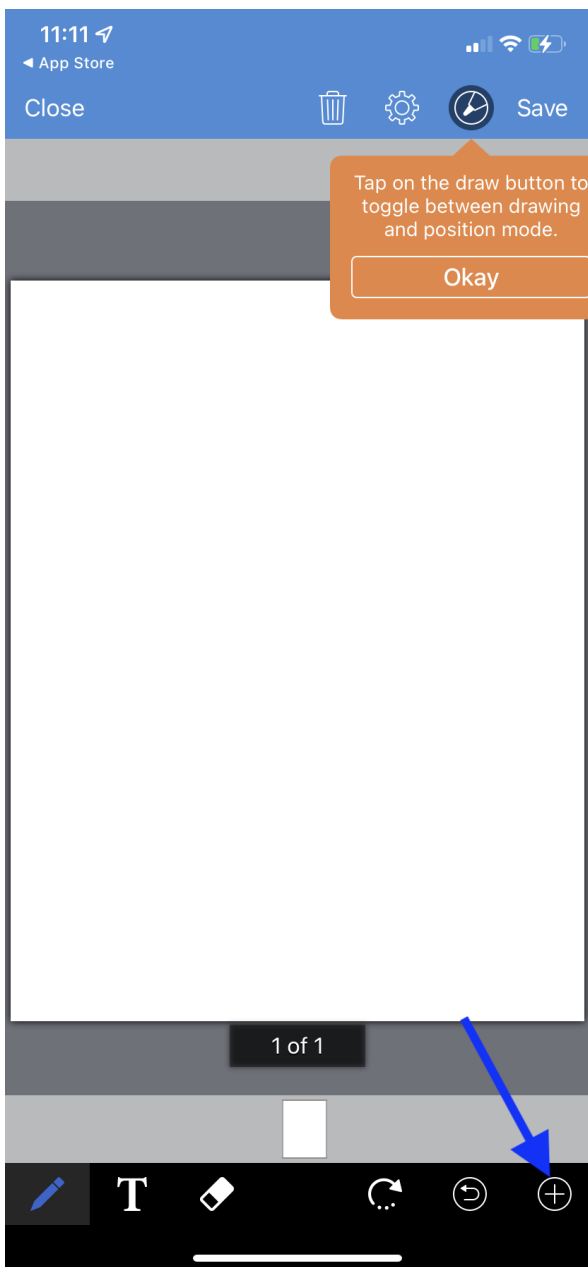

If you have an image stored locally on your iPad or iPhone or an image from the patient's history that you wish to upload and attach to your clinical note, you can do so with the free draw tool in the [EHR/EMR app](#).

The screenshot shows the EHR/EMR app interface on an iPhone. At the top, the status bar displays the time 11:10, signal strength, Wi-Fi, and battery icons. Below the status bar is a blue navigation bar with a back arrow, 'App Store', 'Tools', a heart icon, a person icon, and a menu icon. The main content area is divided into sections: 'HPI' with a text input field and a pencil icon; 'Is the patient new to practi...' with a green toggle switch; 'Findings' with a section header; 'Does the patient have a his...' with 'Yes' and 'No' radio buttons; 'Test' with two input fields separated by a slash; 'Pain Location' with a text input field and a vertical ellipsis; 'Single' with a text input field and a vertical ellipsis; 'Patient Diagram' with a 'Free Draw' button; and 'Images/Documents' with a 'Free Draw' button. A black arrow points to the 'Free Draw' button in the 'Images/Documents' section. At the bottom, there is an 'Include in Note' toggle switch and a 'Section Note' checkbox. The bottom of the screen shows a black navigation bar with a white horizontal line.

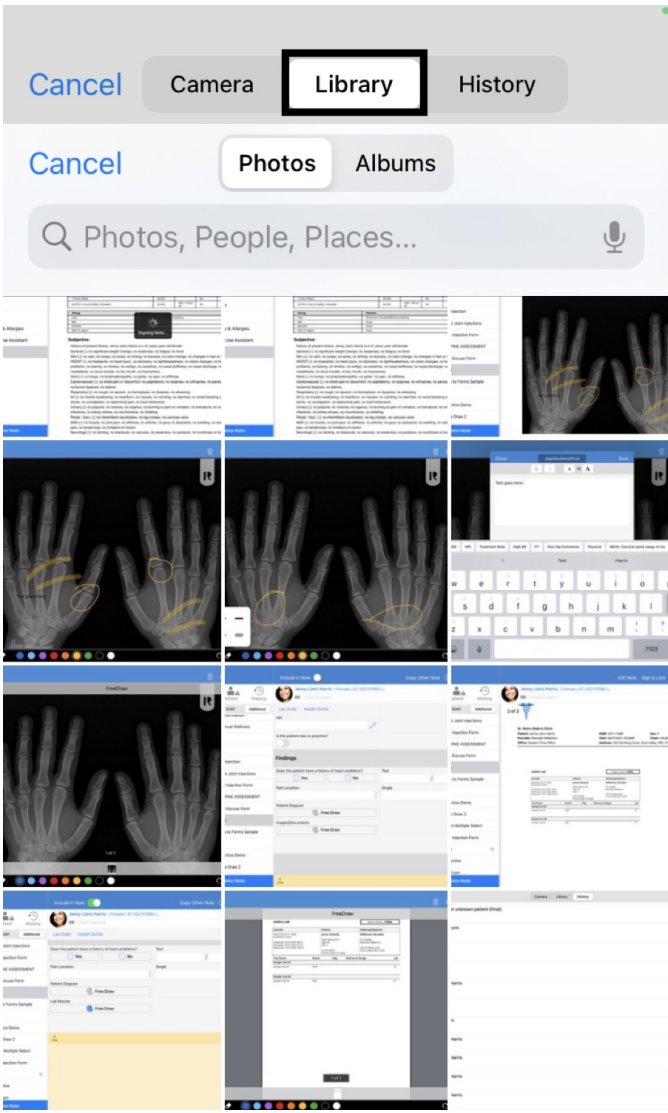

At the bottom of the free draw page, you'll see a navigation bar with your free draw options. Tap on the (

) icon to access your stored documents.

At the top of the camera tool, select the **Library** tab. This will allow you to select from the local images stored in your device's photo library. Tapping **History** will allow you to select images, uploaded documents, or previous clinical notes from the patient's documents. Only 1 page can be added to a free draw field. Tap the document or image to use in the current clinical note.
