## Using Voice Commands for Speechto-Text on the iPhone

07/24/2024 10:11 pm EDT

The Voice Commands functionality allows you to make edits to system documents by speaking, rather than by physically editing the text.

To access the Voice Commands functionality, click or tap **Speech-to-Text Settings** on the **Settings** screen. The following screen is displayed. The **Real-Time Speech-to-Text** option transcribes as you speak, rather than waiting until you are finished speaking to transcribe. The **Enable New Voice Commands** option allows you to use specific phrases. Tap **Restart Now** to enable.
