M1 Mac: DrChrono EHR App

07/24/2024 6:35 pm EDT

What is the M1 Chip?

M1 is Apple's first chip designed specifically for Mac. Apple silicon integrates the CPU, GPU, Neural Engine, and I/O onto a single tiny chip. Packed with an astonishing 16 billion transistors, the M1 delivers exceptional performance, custom technologies, and unbelievable power efficiency.

The M1 Mac will allow you to utilize the DrChrono EHR app on your laptop or desktop just as you would on the iPad (the only thing that won't translate over are iPad touch gestures).

How do I know I have an M1 Mac?

- 1. Click on the Apple icon in the top left corner of your desktop
- 2. Select About this Mac
- 3. If the chip shows Apple M1, Apple M2, etc, your computer is compatible
