Patient Reports

07/24/2024 7:20 pm EDT

The patient report feature allows you to generate patient reports based on demographics, medication, diagnoses, allergies, or lab results.

1. Go to **Reports > Patient Report**.

						12:00pm 1:00pm								

2. Select the parameters you would like to see in your report.

Patient Report		P Feedback
Patient Demographics		Active Medications
Date of Service	From To	Active Problem 💽
Age	From To	Active Allergy •
Sex Race	American Indian or Alaska Native Asian Black or African American Native Hawaiian or Other Pacific Islandes White Other Race	Lab Result 💽
Ethnicity	\$	
Preferred Language		
Demographics Recorded	From To	
Preferred Communication	All	
Pref'd Comm Updated	From To	
	Export Search	

3. Active medications, problems, allergies, and lab results can be used for reports as long as the data is entered into the patient's chart. To search by medication, problem, allergy, or lab results, select the [+] next to the option. Click **Search** to run the report. Click **Export** and it will download the report in a .csv file.
