

Canceling an Appointment through OnPatient

07/24/2024 1:05 pm EDT

If your patients are using OnPatient, they have the option to cancel their upcoming appointments if necessary.

Before your patients can cancel appointments on OnPatient, the setting will need to be enabled.

Go to **Account > Offices** and click on the **Online Schedule** tab. Check the box next to **Allow Patients to Cancel Appointments Online**, scroll down, and **Save**. This setting does need to be enabled for each provider.

The screenshot shows the 'Edit Office' page in OnPatient. The navigation bar at the top includes 'Clinical', 'Patients', 'Reports', 'Billing', 'Account', and 'Marketplace'. The 'Account' tab is active, and the 'Offices' sub-tab is selected. The 'Online Schedule' tab is also selected. The settings list includes:

- Show this office information online
- Allow online scheduling in this office
- Allow existing patients follow ups
- Allow existing patient new appointments
- Allow new patient appointments
- Allow patients to cancel appointments online**
- No confirmation emails

The dropdown menu is open, showing 'PROVIDER SETTINGS' and 'PRACTICE SETTINGS'. The 'Offices' option under 'PRACTICE SETTINGS' is highlighted.

To begin, your patient can view their appointments by selecting the **Appointments** tab on the navigation bar. On the appointments page, your patient can view the list of upcoming appointments and select an appointment to view its details. Have your patient select the appointment s/he would like to cancel.
